Chapter 3: Consumer Behavior

The firm maximises profit where marginal cost equals marginal revenue.

A budget line describes the combinations of goods that can be purchased given a fixed income.

The marginal utility declines as consumption rises.

Mathematical notation: $\sqrt{2} \approx 1.414$, $\partial C / \partial q$, Δx , Σ , $\int$

Set notation: $\subset$ subset, $\in$ membership, $\leq$ inequality.
